

IMPROVED PRODUCTIVITY AND ESSENTIAL REPORTS FOR THE GABLES

BACKGROUND

The Gables is a mixed Residential Care facility, for people with a mental disorder or a learning disability. Specialist care for up to 28 people of low to high dependency, under the age of 65 years, is provided in two small units.

CASE STUDY

THE REQUIREMENT

Knowledge of which employees are on-site at any given time is critical to ensure that vulnerable residents receive the care and supervision they require. Prompt attendance is essential, as important information about individual residents must be communicated at the start of each shift.

The previous system involved staff recording their own hours over the four-week pay period. This meant the proprietors had little knowledge or control of their workforce – a resource costing around £280,000 annually.

Improved productivity and essential reports for The Gables

THE SOLUTION

STANLEY installed Astrow 32 – a powerful, flexible time management system.

“Senior Supervisors reported an instant difference in employee productivity. Astrow 32 is very, very effective”

Astrow 32 is able to provide easy-to-understand reports for payroll, accounting and taxation purposes – and the included training helped to create a customised report showing all pertinent information in a single view.

“The System is easy to use, and the instant help from STANLEY’s excellent Helpdesk is essential for a novice computer user”
