

## AM (ACOUSTO-MAGNETIC) MONO, DUAL & TRIPLE SYSTEMS

The **Stanley AM Mono Pedestal** is today's most technically advanced 58KHz single pedestal system on the market. The system is fully digital and has the latest DSP (Digital Signal Processing) technology that constantly checks the environment, minimising false alarms that you get from using other systems.

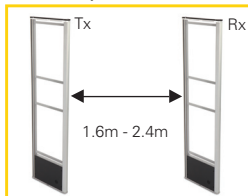

The **Stanley AM Dual Pedestal** provides a cost effective loss prevention application. The system uses DSP and operates on a high level of sensitivity, resulting in an excellent detection rate of up to 2 metres between 2 pedestals. This system is configurable to a variety of entrance sizes by simply expanding the system to create the **Stanley AM Triple Pedestal**.
