

DATASHEET

Pacom .is Admin Manager

Overview

Forming part of the new generation *Pacom .is* (Integrated Suite) of security applications, Admin Manager is an advanced System Administration tool. Designed to assist the *Pacom .is* administrator when managing user permissions, communications ports/protocols, task scheduling and server configuration, Admin Manager covers your entire *Pacom .is* Information Management Network.

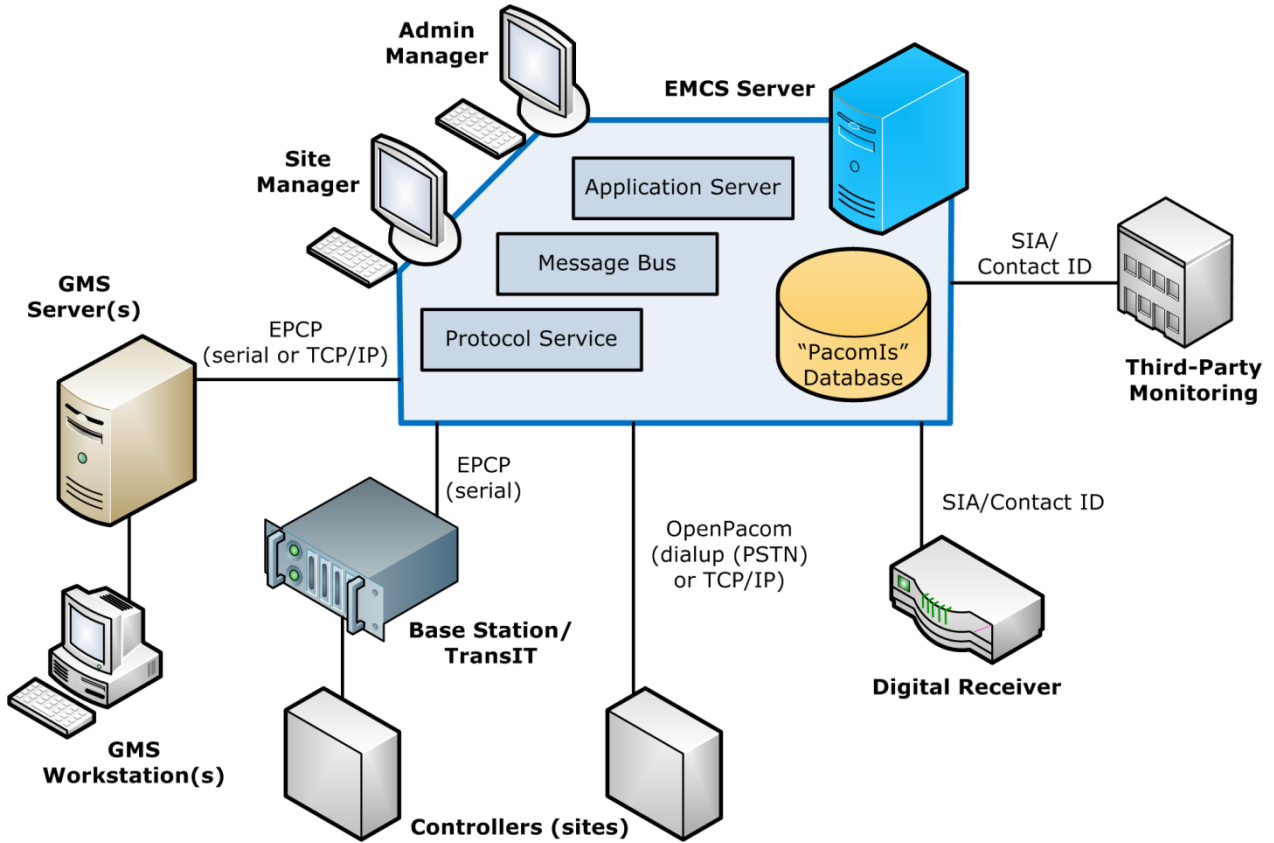

Admin Manager provides a host of powerful features including the ability to provide configuration for a complete disaster recovery solution with standby servers ready for failover, if and when required. In addition, Admin Manager can configure the balance between server components to ensure that the entire system is configured for maximum performance, even during peak times. All this can be done using a graphical representation of your *Pacom .is* Server "Farm" to ensure it is as easy and trouble free as possible.

To ensure familiarity, ease of operation and efficiency, Admin Manager employs the latest Microsoft Ribbon Bar based technology. By using this technology, Pacom has incorporated an intuitive User Interface that is both simple to use and easy to navigate. In addition, Admin Manager is designed with a general philosophy to reduce the number of clicks required to perform and complete a task, what more could you ask for from a revolutionary security configuration tool.

Features

- Advanced administration tool
 - Configure your entire *Pacom .is* server operation
 - Ability to set redundant and disaster recovery options
 - Ability to set and specify communications ports and parameters with connected information systems
 - Balance component operation to deliver maximum performance at all times
 - AES (Rijndael) encryption used for all communications to ensure the highest level of security
 - MS SQL Server compatibility for data storage and retrieval
 - Support for the latest IT technologies
 - Easy to use .NET Ribbon Bar based User Interface
-

Architecture

Hardware Requirements

Component	Minimum Requirement
Processor	233Mhz x86 (32-bit)
Memory (RAM)	1GB minimum
Hard Disk Drive	320GB minimum
Graphics	16MB Graphics Memory @ 1280 x 1024 Resolution
Ports	1 x Ethernet Port, 1 x USB Port

Software Requirements

Component	Requirement
Operating System	Windows 7

Ordering Information

Part Number	Type Code	Description
120 001 004	PIS-ADMIN	Additional Pacom .is Admin Manager client connection license
