

Digital Communal Television Aerial/Satellite Systems

*For a complete installation
and maintenance solution*

5-Wire Satellite IRS/SKY + System

Integrated Solutions

In today's fast moving environment where technology changes rapidly, it is important to employ flexible solutions that can adapt and change with your individual needs.

Our products can be fully integrated to create a complete networked solution, backed by our comprehensive service including product technology, finance and service in order to add value to your TV Distribution System.

For example, integrating a TV Distribution System with your CCTV and Door Entry solution can increase security for your residents by enabling them to view visitors on their TV screens before allowing entry.

This integrated approach extends throughout our entire business – all guaranteeing an industry-leading service to our customers.

Total Service Solution

Our maintenance cover and after sales support provides flexible and rapid response across the UK, with particular emphasis on health and safety, quality and service response. We are an ISO9001:2000 accredited company and our own call centre is able to receive calls direct from residents avoiding the need to burden your own help desk. Key Performance Indicators (KPI's) can be provided to measure call levels and performance against the agreed levels of service. Our service team are amongst the most experienced in the field with many having in excess of 25 years experience in servicing TV aerial systems for Local Authorities, Housing Associations and Private Landlords.

Strategic Partnering Solutions

Stanley Blick's strategic partnering solutions provide the capital finance to fund the design, equipment installation and servicing for new IRS systems.

- No capital outlay, we invoice a quarterly service charge to the landlord or managing agent
- In some cases this can be recovered from residents via their service charges (please check with your housing management team)
- In some areas residents on low income may have the service charge met through housing benefit (check with your housing management team)
- We include full maintenance for the term of the agreement which assures you of our vested interest in the quality of the installation
- In house finance means the agreement is directly with Blick, there are no third party leasing companies, which means you have long term leverage over our performance.
- You are protected against equipment obsolescence, unlike a capital purchase this risk remains with Blick
- The agreement can be re-assigned in event of stock transfer

Stanley Security Solutions is a wholly owned subsidiary of The Stanley Works, an S&P 500 company with extensive strengths and resources, operating in 131 countries worldwide, with over 15,000 employees, 50,000 products and around \$3 billion annual revenue.

At Stanley, we provide more than a range of products. We provide true peace of mind – through knowing that you have the most advanced and practical technology, the most supportive maintenance, and an affordable source of funding. With a wide range of systems that integrate for easy operation and adapt as your organisation evolves, you will also benefit from a complete sense of satisfaction.
